Subject: Implementation of Samarth e-Governance Platform in School Education
- Requesting for the involvement of ADEIs in coordinating SAMARTH Project
in School.

The Goa State Higher Education Council has initiated the implementation of the Samarth e-Governance platform in the school education system of Goa, beginning in the academic year 2025. This initiative aims to streamline administrative processes, improve efficiency, and standardize data management across all educational institutions in the state.

To ensure a smooth transition to the digital platform, the Goa State Higher Education Council has already initiated briefing and guidance sessions for the schools selected for the pilot phase of Samarth implementation. These efforts aim to prepare schools for onboarding and familiarize them with the functionalities of the Samarth portal.

School Onboarding Process

As part of the onboarding process, each school are required to complete self-onboarding on the Samarth portal by configuring the base module with essential school details. The data collected through this process is in alignment with the requirements of UDISE, ensuring uniformity, accuracy, and standardization across all institutions.

To maintain data integrity and ensure accuracy, it is essential that the preliminary data entered by schools undergoes a thorough validation process in the initial phase before progressing to further stages of implementation.

Role of ADEIs in Data Validation and Compliance

To facilitate this process, it is recommended to involve all the ADEIs (Assistant District Education Inspectors) of all twelve Talukas in the review, validation, and authentication of school data submitted within their jurisdiction on the Samarth portal. This validation process will help ensure that all school records are accurate, complete, and consistent, making them ready for subsequent stages of onboarding.

Once the verification process is successfully completed, schools will proceed to the next steps in integrating with the Samarth e-Governance platform.

In view of the above, ADEIs be requested to direct all Heads of Schools and Higher Secondary Schools under their jurisdiction to comply with the Samarth e-Governance portal requirements. This should be done in close coordination with the Samarth Project Unit team, which will provide continuous guidance, support, and technical assistance throughout the onboarding process.

Given the urgency of this implementation, Goa State Higher Education Council may request Directorate of Education, Government of Goa, to issue the necessary instructions to ADEIs to coordinate with the Samarth e-Governance Project Unit
